STANLEY UGWU

React Native Engineer | Full-Stack (Node.js)

Lagos, Nigeria (open to remote, worldwide) | (+234) 903 315 5169 | stanleyugwu2018@gmail.com
github.com/stanleyugwu | stanleyugwu.carrd.co | dev.to/stanleyugwu

SUMMARY

React Native engineer with 5 years shipping production apps for UK, US, and Nigerian companies. Creator of @devvie/bottom-sheet, an open-source package with 41,000+ monthly downloads and 360+ GitHub stars. Former lead engineer; works end-to-end, React Native frontends to Node.js backends.

SKILLS

Mobile: React Native, Expo, Reanimated | Languages: TypeScript, JavaScript | Frontend: React.js | Backend: Node.js, MongoDB, Firebase | Testing: Jest

EXPERIENCE

Tensfer Ltd — Full-Stack Software Engineer *Remote (UK) | Dec 2024 – Present*

- Built a backend-as-a-service powering multi-exchange crypto operations (Binance, Bybit, and others), covering secure deposits, withdrawals, and request signing.
- Designed AI-powered pipelines for crypto workflows: prompt-driven operations with output validation and system-level decision gates.
- Built a non-custodial wallet with hardened secrets management for user funds and sensitive credentials.

Rivong Digital Agency — Mobile Engineer (Contract) *Remote (Nigeria) | Sept 2025 – Jan 2026*

- Stabilized two live React Native apps (customer food-ordering and rider delivery) by fixing broken core functionality in production under tight deadlines.
- Reworked real-time rider tracking and location services, raising location accuracy from 30% to 90% and restoring reliable pickup-to-drop-off tracking.
- Re-engineered food categorization, customer location detection, and distance/weight-based delivery fee calculation for accurate, consistent pricing.

9th Tech Ltd — Mobile Software Engineer *Hybrid (USA / Nigeria) | Feb 2025 – Apr 2026*

- Rebuilt the customer marketplace with a cross-platform UI/UX, scaling to 5,000+ listings and cutting list load and render times by 40% via FlashList migration.
- Introduced a feature-based architecture and rebuilt app navigation (bottom tabs, drawer, stacks), enforcing cleaner module boundaries.
- Built a multi-tenant vendor app from scratch, consolidating 4 separate platforms (sellers, service providers, real estate, logistics) into one production app.

Spotip LLC — Mobile Software Engineer *Remote (UK) | Jul 2024 – Feb 2025*

- Established core app architecture; shipped betting, live scores, match voting, and real-time updates.
- Reduced screen time-to-interactivity by 70%, directly improving engagement and app-store reviews.

Webmack LTD — Lead Mobile Software Engineer *Remote (Nigeria) | Apr 2022 – Jan 2024*

- Led a team of mobile developers through the full development lifecycle, owning architecture decisions and delivery timelines.
- Mentored junior developers through code reviews and technical guidance, measurably raising code quality and contribution volume.

Mogatrev Inc. — Mobile Engineer (Contract) *Remote (USA) | 2021*

- Built the Escapees RV Club membership app (US client) with third-party IAM-based authentication and real-time features; 6,000+ App Store downloads.
- Implemented real-time, map-based distance calculation for fuel-station tracking with live fuel-price updates.

OPEN SOURCE & PROJECTS

@devvie/bottom-sheet — Creator & Maintainer *npmjs.com/package/@devvie/bottom-sheet*

- Zero-dependency React Native bottom sheet adopted widely in production: 41,000+ monthly downloads and 360+ GitHub stars.

Wattly Pay — Electricity Payments App *Google Play | Source on GitHub*

- Electricity top-up app with secure wallet/transfers via integrated payment providers; source code public.

EDUCATION & RECOGNITION

B.Sc. Computer Science — Enugu State University of Science & Technology (ESUT) *Expected 2026*

Prize winner, Genesys Ignite competition | React Native Mentor, DevByte Community | Conference speaker
